Superintendent's Message

To the Seniors of 1955, we, your teachers, wish for you the success and happiness you have justly earned through your perseverance and toil during the past twelve years.

You have crossed the threshold into a new era, the Atomic Era, which offers to you opportunities never before dreamed possible. Those of you who have imagination, foresight, vision, and initiative, coupled with a moral and ethical sense of fairness, justice, tolerance, courtesy and kindness may attain the pinnacle of success never before reached by the youth of our great democracy--America.

I wish to congratulate you on the publication of the 1955 Round-Up.

Sincerely,

C. R. Landrum

Principal's Message

Congratulations on a job well done. In spite of financial reverses you have succeeded in adding to your school's traditions. May God be with each of you in the years that follow.

MORE POWER IN YOUR FUTURE!

You'll probably be using more electricity ten years from now than your parents are today. Ever since Thomas Edison invented the first practical electric light, we've been finding more and more uses for electric service. And we've only begun to find ways of making life easier, healthier and happier--through electricity. Electricity does so much, yet costs so little. It's today's biggest buy.
